

BUILDING COMMITTEE UPDATE - SEPTEMBER 20, 2016

- The Steering Committee met with the City of New Westminster on Thursday August 11, bringing all key staff up to speed on the project to date. The City shares our concern around finding a way forward to deal with the seismic upgrade.
- Staff showed an openness to work with us on supporting a tower, and reiterated that this will be a process. There is solid support for both the renovation of the cathedral itself and the continuation of the HTC's community services.
- ConWest is moving forward to get updated costs for the Church seismic upgrade and restoration and parish hall. They are also working with an architect to create multiple development concepts that will better fit the City's requirements.
- The Steering Committee will next meet with ConWest on September 27 to reflect some more on our August meeting with City, as well as to review the revised options for the City as well as to discuss the LOI that will need renewing with ConWest.
